

## **Fishbeam Software Releases Goldfish 3.1**

Today, Fishbeam Software releases the website creation tool Goldfish in a new version. Goldfish 3.1 comes with some new features like the support of Macintosh Drag and Drop. Many bug where fixed too. Goldfish 3.1 is available for download at <http://www.fishbeam.com> starting from \$69.90 and is free for all existing Goldfish 3 users.

### **New features in Goldfish 3.1**

- Drag and drop for text: Drag text from the desktop to Goldfish, vice versa and to other documents.
- Drag and drop for page item: Drag page items to the desktop and to other documents.
- Drag Goldfish Clips to the desktop and other applications.
- Copy and paste gallery images between two galleries.
- Copy and paste form items between two forms.
- Drag gallery images to the desktop and between galleries.
- New Goldfish badge item shows a link to Fishbeam on the website.
- New Navigation Menu Link in the project list: Shows a custom link in the navigation menu.
- The contact form is better protected against spam attacks.

### **Fixed bugs in Goldfish 3.1**

- Fixed display errors of Goldfish websites in Mobil Safari (iPhone, iPod Touch).
- Fixed a css validation error of generic fonts: The css passes now the w3c test.
- A drag and drop operation does not show wrong drag borders on the page list any more.
- The duplication of a page item with attached media files does not duplicate the media any more.
- The replacement of an older version of a media file with a new version of the same file does not rename it any more.
- HTML Code in the HTML Code item will be included in the built website again (broken in Goldfish 3.0).
- The comment item works now with PHP versions lower than 5.

- The menu item shows the correct margin horizontal between the main menu and the sub menu.
- Corrected window title if the property Disable HTML Code Output is enabled.
- Fixed a bug in the cart item that calculated a wrong tax amount.
- The comments item accepts now new line characters in comments.
- Fixed a bug where Goldfish crashed on Windows.

### **About Goldfish 3**

Goldfish 3 is a website creation tool, which runs on Macintosh and Windows. Users can build their website in a few simple steps with drag and drop. There are many beautiful designs available for beginners. Professionals can create the layout for their website without programming skills. Goldfish is free to try and free for download.
